

Will it fit?

Every piece we make is handcrafted to order, so it's worth a few minutes with a tape measure before it leaves Yorkshire. Check the dimensions below against your doorways, hallways, stairs and landings, and delivery day should go smoothly. This is a guide, if any space looks tight, get in touch and we'll help you work it out.

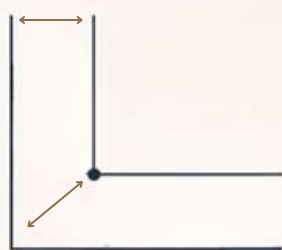

01 Measure your new piece

Use the table below to note down the width, depth and height for the items you have ordered. You'll find exact dimensions on each product page.

	A – WIDTH	B – HEIGHT	C – DEPTH
Mattress			
Bed Base			
Headboard			

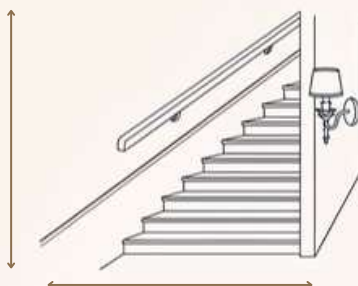

02 Measure the route in

Walk the path your delivery will take, from the front door to the room, and check each of these against the dimensions above.

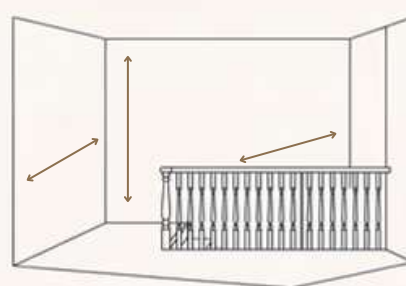

HALLWAYS & CORNERS

Measure the narrowest point of any hallway, and check the width of any tight turns, a piece that fits a straight run can still stick on a corner.

STAIRCASES

Measure the width of the stairs at their narrowest point, allowing for handrails and any light fittings that jut into the space.

LANDINGS

Measure the width, depth and height of any landing. If there's a bannister to lift over, check the gap between bannister and ceiling too.

A few things to check per piece

MATTRESSES

Mattresses are the least forgiving on tight corners, since they can't be broken down. If your narrowest gap is close to the mattress height, ask us about the diagonal. A mattress usually clears a gap wider than its narrowest edge when tilted.

BED BASES

Our bases are usually delivered in sections and built in the room, so it's the size of the largest single part, not the whole base, that needs to clear your doorways and stairs. Check our product page for exact dimensions.

HEADBOARDS

For headboards the width and height against your narrowest point matter most. Once it's in the room, check it against your wall width and any sockets, switches or radiators it needs to clear of.

Once it's through the door

Leave enough clearance in the room itself — for the finished piece to sit comfortably, and for any drawers, mattress lift or headboard tilt to open fully. It's easy to measure the route in and forget the room at the end of it.

STILL NOT SURE IT'LL FIT?

Send us your measurements and we'll help you check before you order.
